arwa-class – in a class all its own

arwa-class encompasses sophisticated technology and classically elegant styling. The range has been given a complete makeover and now represents a unique combination of form and function.

Extensive range

- arwa-class leaves nothing to be desired, either in the kitchen or the bathroom. With its on-wall, flush-mounted and built-in mixers offering a choice of bath-filling options, arwa-class is a range complete in itself.
- arwa-class metal finish: chrome is a high-quality proven plating solution favoured for that contemporary look in the bathroom. Kitchen fittings are also available in Stylox – suitable for the sink.

Exceptional solutions for refurbishments

- arwa-class includes wall mixers with a fitting clearance of 153 mm and 120 mm.
- The shower mixers are also available with a fitting clearance of 120 mm.
- Rounding out the refurbishment line is a vertical bath mixer.

Function and technology

New «Trigon» mixing technology – the all-round performer

Trigon offers convenience, hygiene and safety – it saves water, too.

- Safety and energy conservation thanks to a temperature limiter.
- Water conservation thanks to an in-built flow restrictor.
- Convenient and hygienic with a clearly delineated flow and temperature control; the system stays hygienically sealed at all operating lever positions.

Intrinsically safe

In-built back-flow valves prevent wastewater flowing or being sucked back up the system.

Modular system – arwa-class and arwa-clinic

arwa-class benefits from having a particularly user-friendly operating lever, though this can easily be replaced by the arwa-clinic solution (lever conversion set 9.63685.100.001) and vice-versa – for flexible adaptability to the given circumstances, e.g. when there is a change of room inhabitants in a care home.

Title page: washbasin mixer with 145 mm swivel spout 9.38752, also available with fixed spout and Ecototal+ 9.38762

Classical elegance in today's kitchen

Sink mixer with multi-function spray 9.39655

A host of practical advantages

- Heat-insulated multi-function spray with separate water feed.
- Features a handy rocker switch for automatic spray pattern control. Easy-clean, removable spray head.
- The hard-wearing, quiet and slinky metal hose directs the water exactly where it's needed!

Sink mixer with swivel spout 9.39512

Harmonious design for the modern bathroom

Washbasin mixer with 110 mm fixed spout 9.38835

A range that leaves nothing to be desired

- The wide choice guarantees a solution for every application and an unequalled cost-performance ratio.
- Washbasin mixers with or without swivel spout (with or without waste valve) and flush-mounted mixers are available with a variety of spout reaches and can be combined with any washbasin.
- The shower is available on-wall or flush-mounted. It can be complemented by the shower station, which is easy to retrofit.
- The bath mixer is also available on-wall or flush-mounted, as is an in-built bath mixer. A bath-filling combination for large baths is also available.
- For maximum convenience, the range is fitted with a multi-pattern spray head and a high-quality synthetic hose as standard.
