# arwa-surf – for people with a strong sense of aesthetics

arwa-surf – the innovative, perfectly formed mixer. With its vigorous lines, the design is impressively convenient, practical and environmentally compatible, too.

## Extensive range

- arwa-surf leaves nothing to be desired, either in the kitchen or the bathroom. With its on-wall, flush-mounted and built-in mixers, arwa-surf is a coherent range complete in itself.
- arwa-surf metal finish: chrome is a high-quality proven plating solution favoured for that contemporary look in the bathroom.

## Function and technology

### Mixing technology

arwa mixing technology offers convenience, hygiene and safety – it saves water, too.

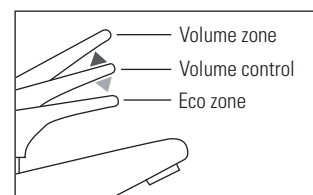

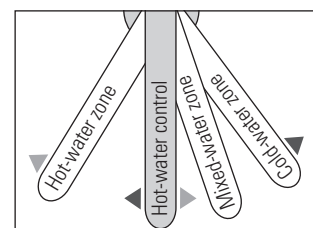

- Safety and energy conservation thanks to a temperature regulator or limiter.
- Water conservation thanks to a flow limiter or restrictor.
- The silky-smooth, precise mixing cartridge makes it a delight to use – plus it's hygienic thanks to the perfectly rounded lines.

### ecototal® – the economy cartridge

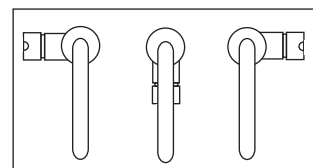

The faucets of the arwa-surf bathroom line all come equipped with the ecototal® economy cartridge that helps save energy and water.

- The built-in hot water choke helps save up to 33% energy. A slight resistance felt when the lever is turned beyond a certain point in the horizontal swivel range indicates that the faucet is exiting the temperature economy zone.
- The built-in volume choke helps save up to 30% water. A slight resistance felt when the lever is operated beyond a certain point in the vertical swivel range indicates that the faucet is exiting the volume economy zone.

### Choice of operating positions for the kitchen

The operating lever of the in-built faucets with high-level spouts may be positioned at the left, right, or frontally as preferred.

### Intrinsically safe

In-built back-flow valves prevent wastewater flowing or being sucked back up the system.

## Vigorous lines for the modern kitchen

Sink mixer with pull-out spout 9.19615

### A host of practical advantages

- Heat-insulated pull-out spout with separate water feed.
- Pull-out/hinged spout facilitates fitting beneath windows.
- High-level spout leaves plenty of clearance in the sink.
- The hard-wearing, quiet and slinky metal hose directs the water exactly where it's needed!

## Perfectly formed for the trend-setting bathroom

Washbasin mixer with 110 mm fixed spout 9.18520

### One range: simple yet compelling

- The wide choice guarantees a solution for every application and an unequalled cost-performance ratio.
- Washbasin mixers with or without waste valve and wall mixers can be combined with any washbasin.
- The shower is available on-wall or flush-mounted. It can be complemented by the shower station, which is easy to retrofit.
- The bath mixer is also available on-wall or flush-mounted.
- For maximum convenience, the range is fitted with a multi-pattern spray head as standard.
