arwa-quadrige – tomorrow's classic

arwa-quadrige represents perfect functional design. Distinctively timeless, its clean, contemporary lines are an immediate delight. The curvilinear, orthogonal look creates exciting contrasts between the flat surfaces and rounded edges.

Extensive range

- arwa-quadrige leaves nothing to be desired, either in the kitchen or the bathroom. With its on-wall, flush-mounted and built-in mixers offering a choice of bath-filling options, arwa-quadrige is a range complete in itself.
- arwa-quadrige metal finish: chrome is a high-quality proven plating solution favoured for that contemporary look in the bathroom. Kitchen fittings are also available in Stylox – suitable for the sink.

Function and technology

New «Trigon» mixing technology – the all-round performer

Trigon offers convenience, hygiene and safety – it saves water, too.

- Safety and energy conservation thanks to a temperature limiter.
- Water conservation thanks to a flow limiter.
- Convenient and hygienic with a clearly delineated flow and temperature control; the system stays hygienically sealed at all operating lever positions.

Choice of operating positions

The operating lever of the in-built faucets with high-level spouts may be positioned at the left, right, or frontally as preferred. The pivoting angle of the spout is adjustable accordingly.

Intrinsically safe

In-built back-flow valves prevent wastewater flowing or being sucked back up the system.

Functional design for the kitchen

Sink mixer with pull-out spout 9.79673

A host of practical advantages

- Heat insulated pull-out spout with separate water feed.
- Pull-out/hinged spout facilitates fitting beneath windows.
- High-level spout leaves plenty of clearance in the sink.
- The hard-wearing, quiet and slinky metal hose directs the water exactly where it's needed!

Sink mixer with swivel spout 9.79532

The design line for exclusive bathrooms

Washbasin mixer with 110 mm fixed spout 9.78827, also available with 130 mm spout 9.78837 and as a column mixer (height 321 mm) with a 130 mm spout reach 9.78885

A range that leaves nothing to be desired

- The wide choice guarantees a solution for every application and an unequalled cost-performance ratio.
- Washbasin mixers with or without swivel spout (with or without waste valve) and flush-mounted wall mixers are available with a variety of spout reaches and can be combined with any washbasin.
- The shower is available on-wall or flush-mounted. It can be complemented by the shower station, which is easy to retrofit – no special installation necessary.
- The bath mixer is also available on-wall or flush-mounted. A variety of bath-filling combinations for large baths is also available.
